# Save Water Poster Presentation

Graphic Design – Assignment 1

**Ghulam Hussain**

Department of Software Engineering

# Project Overview

A comprehensive approach to visual communication for environmental sustainability.

# Concept & Objective

## The Problem

Global water scarcity is an escalating crisis. Many individuals are unaware of the impact of daily water waste at home and university.

## The Solution

Creating a minimalist, high-impact A4 poster that uses psychological color triggers and clear typography to drive behavioral change.

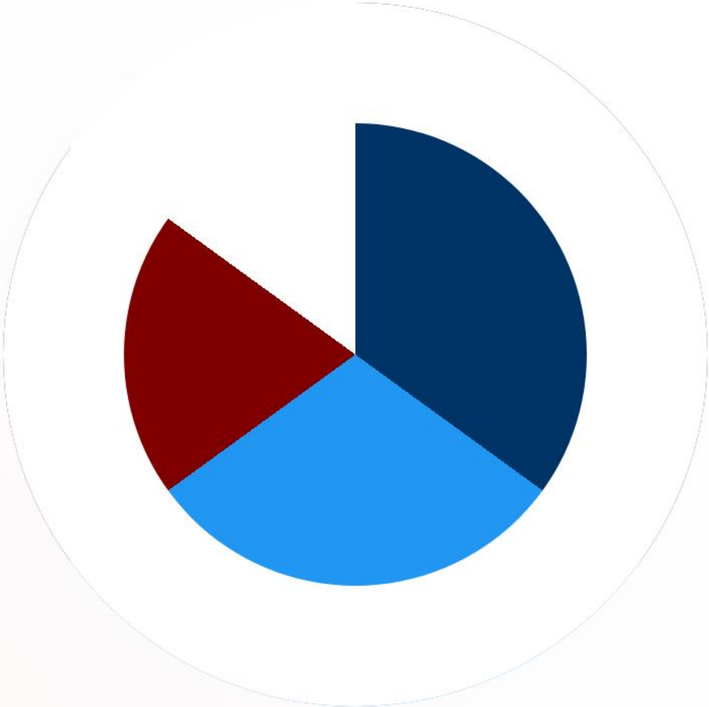
# Assignment Requirements

| Requirement | Implementation Detail | Compliance |
|---|---|---|
| Page Format | Standard A4 Portrait Layout | ✓ Verified |
| Color Palette | Limited to 4 Professional Colors | ✓ Verified |
| Typography | Poppins (Sans) & Lato (Sans) pairing | ✓ Verified |
| Visual Elements | Stylized Tap Icon & Water Waves | ✓ Verified |

## Design Strategy

Applying Software Engineering precision to Graphic Design principles.

# Color Palette & Psychology



- Navy Blue (Trust & Authority)
- Sky Blue (Water & Clarity)
- Maroon (Urgency & Call-to-Action)
- White (Negative Space & Neatness)

# Typography & Font Pairing

## Poppins (Headings)

A geometric sans-serif that provides a modern, clean, and professional look. Used for the primary "SAVE WATER" title to ensure immediate readability.

## Lato (Body Text)

A balanced sans-serif with a warm feel. Used for supporting text and instructions to maintain a clear visual hierarchy and friendly tone.

# Core Principles Applied

## Hierarchy

Strategically sizing text so the eye travels from the Title to the Icon to the Tips.

## Contrast

Using Maroon on White to highlight "SAVE" as a critical command.

## Balance

Distributing icons and text to avoid a crowded or cluttered appearance.

# Workflow Timeline

## Research

Analyzing effective conservation posters.

## Sketching

Rough layout and grid planning.

## Design

Vectorizing icons and pairing fonts.

## Refinement

Adjusting margins and white space.

# Poster Readability Impact

*The design ensures the message is understood in less than 3 seconds.*

## A Sustainable Future

Through clean design and strategic communication, we can protect our most precious resource. This poster is more than just a task—it is a call to action for every student on campus.

# Questions?

Thank you for your attention.
